Research Fees

Program Fees allow researchers to perform multiple experiments under the same fee, with an area surcharge to account for variability in usage intensity. Waivers or reduced fees may be available; contact the Director for details. An estimate of fees will be provided with project approvals.

	Program	Study	Collection only
Fee	\$1,600/year UofT \$1,750/year non UofT	\$775/ study UofT \$875/ study non UofT	\$275 Collection fee only
Experiment Limit	None	Director's Discretion	n/a
Area Surcharge	0-2,000 square meters at \$0.38/meter ² /year	n/a	n/a

Two (2) hours of site prep, water delivery, or labor from the KSR staff is included in these rates. Also included is access to classroom, dry lab, and wet lab space. All wet lab users must be trained and have Director's approval.

Definitions:

Program: Multiple experiments, studies, pilot projects, collections, and investigations per lab or research group.

Study: Observational study compatible with alternate uses or not requiring maintenance or site preparation. **Examples:** Observational vegetation sampling, behavioral observations, remote sensing.

Area: Land area demarcated for use by a single PI. Precludes other uses and restricts access by other users. **Examples:** fenced plots, marked zones around cattle tanks, large screen structures to exclude pollinators, plowed fields.

Collection: Sampling of organisms or specimens for further analysis in a PI's home lab. Collection activities must be pre-approved, non-depleting, and avoid conflicting with other uses. **Examples:** Collecting nematodes for sequencing, seeds for crossing experiments, aquatic larvae for lab work.

Set-up and Maintenance Fees

Setup, maintenance, mowing, plowing, water delivery, etc. by the Station or Facilities Manager are billed at \$60/hour.

Vehicle Usage Fees

Vehicles are available for daily use at \$0.54km
